Chisom Hermes Chigoziri
Web Developer

hermeschigoziri@gmail.com | github.com/TruePadawan | hermes-portfolio.vercel.app

PROJECTS

Animehaven | **Next.js, Supabase, Material UI**
- Enhanced UX by migrating the app to Next.js, leveraging its static-site generation to overcome API rate limit
- Improved responsiveness by adopting WebP format and implementing lazy loading technique for images
- Implemented user search feature by migrating app from Firebase to Supabase, capitalising on its robust database search feature

Anon | **Next.js, TailwindCSS/SCSS, Mantine, Cypress, MongoDB**
- Implemented component testing using Cypress which helped validate that React components worked as expected
- Integrated a suitable rich text editor which reduced the time spent on developing the project

Hardware Inventory | **Node.js, Express.js, Pug, MongoDB, Mongoose, Cloudinary**
- Reduced network bandwidth by using Cloudinary to resize and optimise uploaded images
- Streamlined development process by implementing the Model-View-Controller (MVC) pattern

SKILLS

Programming Languages: JavaScript, TypeScript
Web Technologies: React.js, Next.js, TailwindCSS, HTML, CSS, SCSS, Prisma
Developer Tools: Git, Cypress, Figma, Notion
Databases: MongoDB, Supabase
